

JBL ProFlora m001 duo

Pressure reducer for refillable CO2 cylinders

- Safe and precise CO2 dosing for two aquariums: precision pressure reducer for refillable CO2 cylinders, cylinder pressure from 60 to 1.5 bar
- Easy to use: screw pressure reducer onto the disposable cylinder. Connect it with two hoses to the diffusers in the aquariums. Adjust CO2 bubble count at both separate fine needle valves
- Precision needle valve: exact adjustment of bubble count, preadjusted working pressure: 1.5 bar (readjustment possible), 2 pressure gauges: working and cylinder pressure, connection thread: W 21.8x1/14
- Safe to use: excess pressure safety valve, highest reliability: diaphragm controlled pressure reducer
- Package contents: pressure reducer for refillable CO2 cylinders, ProFlora m001 duo, 2 outlets

Product information

Ideal nutrition for plants

Carbon dioxide serves as the main nutrient for plants and thus promotes their ideal growth. Plants use CO₂ for photosynthesis and thus supply the water with essential oxygen. They prevent algae growth, remove pollutants, offer hiding places and reduce pathogens. The correct amount of CO₂ varies from aquarium to aquarium and depends on the volume, the water movement and the planting of the aquarium. With the JBL pressure reducer a precise dosage of CO₂ is possible.

Easy to install

Screw fitting onto the disposable CO₂ cylinder. Connect the pressure reducer with two hoses to the diffusers in both aquariums. Adjust the CO₂ bubble count with the fine needle valves. The two pressure gauges indicate the cylinder and the working pressure.

javascript;

The pressure reducer is equipped with an excess pressure safety valve. This ensures a safe release if the working pressure is set too high, without damaging the fitting. The diaphragm control of the pressure reducer ensures absolute reliability. Tip: can also be connected to fit refillable cylinders by unscrewing the connector nut.
