

# JBL TempProtect light

Reptile thermal burn protection for JBL TempSets

Suitable for:   

- Thermal burn protection for reptiles in the terrarium: lamp screen made of stable, heat-resistant special plastic
- Suitable for: UV spotlights, metal-halide lamps and other lamps
- Prevents overheating and consequently a shortened life expectancy of the lamp
- Highest safety: narrow slits, fine mesh width to prevent young animals from entering and burning themselves
- Package contents: reptile thermal burn protection for JBL TempSets, TempProtect light

## Product information

### Modelled on nature

Terrarium animals are cold-blooded animals, which are strongly dependent on light, especially on the quality and intensity of the light. Activity, food intake, digestion or rest phases are influenced by the change of day and night and the intensity of light. Depending on the light source, there are differences in output and quality of the light.

### Protection of the animals

UV spotlights, metal-halide lamps and other lamps become very hot. JBL has TempProtect light to protect the animals from burns. As well as protecting the animals the screen prevents the lamp from overheating and thus extends its service life.

### Optimal safety

The narrow slits in the screen and the fine mesh width prevent young animals from entering and burning themselves.
