

 **JBL AccliPond®** activates resistance through high quality plant extracts and enhances the vitality of pond fish. JBL AccliPond® ensures stress-free transport of fish and supports the acclimatization of pond fish. Iodine contributes to normal energy metabolism. Folic acid is a water-soluble B vitamin and contributes to normal functioning of the immune system.

Application:

- To increase readiness to spawn (ripeness).
- Year round to enhance the health of the fish.
- After the use of remedies.
- When new fish are introduced into a pond and during the transport of fish.

Dosage:

Shake the bottle vigorously. Mix the required amount with pond water in a watering can and distribute evenly in the pond.
