

JBL ProFlora Taifun Extend

Extension for diffuser ProFlora Taifun

- Extension module for CO2 diffusers for the change to bigger aquariums or for harder water
- Easy to integrate into the JBL Taifun diffuser
- Extends the diffusion path: 50 cm, increases CO2 supply: suitable for all common CO2 systems, 5 modular parts of 16 mm each in height
- Sturdy Makrolon, can be completely dismantled , easy to clean, increases capacity by 100 l at 10 °dKH or 200 l at 4 °dKH
- Package contents: extension for CO2 high-performance diffuser, ProFlora Taifun Extend, incl. 1 retaining clip, 1 suction holder

Spare parts

JBL Suction cup with clip 37 mm

Rubber suction cup with clip
for objects of 37-45 mm

JBL ProFlora Taifun Extend

Product information

Ideal nutrition for plants

The right CO₂ concentration in the water is of great importance for the aquarium plants. Carbon dioxide is the main nutrient for plants and promotes their growth. Plants use the CO₂ for the photosynthesis and thus supply the water with essential oxygen. They prevent algae growth, remove pollutants, provide hiding places and reduce pathogens.

Even enrichment

The JBL diffuser supplies the aquarium water with the main plant nutrient CO₂ in even-sized bubbles.

Easy to install

The diffuser is suitable for all usual CO₂ systems. Connect to CO₂ hose with 4/6 mm. Attach diffuser with suction holder in the aquarium.

Effective

The built-in special ceramic ensures especially small and even-sized bubbles. Diffuser in high-quality glass design.

The correct CO₂ amount varies from aquarium to aquarium and depends on the volume, the water movement and the planting of the aquarium. You can check the CO₂ content by means of a CO₂ test.
