

Refillable storage cylinder with 2 kg CO2

Suitable for:

- Ideal CO2 supply for fast and slow growing aquarium plants
- Easy to use and effective: refillable 2 kg reusable cylinder (thread W 21.8 x 1/14)
- Suitable for all CO2 systems. CO2 with drawal with JBL m001 fitting or other pressure reducers with connection thread $\rm W~21.8x1/14$
- TÜV tested, pressure cylinder with overpressure relief. Free-standing: cylinder cannot fall over, no stand required

Country: Bulgaria

Language: English

■ Package contents: refillable cylinder filled with 2 kg CO2, dimensions: 46 x 11.5 cm.

JBL PROFLORA stand CO2 storage cylinder 500 g Stand for cylinders of CO2 fertiliser systems

JBL PROFLORA m001
Fitting to reduce pressure

JBL ProFlora m001+ v002

Product information

Disposable or reusable CO2 cylinder?
There are 2 different cylinder types: disposable cylinders that are disposed of and recycled after emptying and reusable cylinders that can be refilled again and again. Many pet shops and gas companies can carry out the refilling. If you, for example, live in a region where refilling is a problem, the disposable cylinder would be an alternative. Should the refilling situation improve, you can always convert the disposable pressure reducer into a reusable pressure reducer in 2 minutes by unscrewing the adapter (JBL PROFLORA ADAPT u-m). Aquarists who live on islands, for example, are sometimes not allowed! sometimes allowed!

The size of the cylinder often depends on the cabinet in which the CO2 storage cylinder is to be placed: A 500 g disposable bottle is only 31 cm high (plus pressure reducer = 37 cm), a 500 g reusable bottle with stand is already 43 cm high and a 2000 g bottle 45.5 cm high. Basically, of course, a larger cylinder is an advantage, because it simply needs to be replaced or refilled less frequently.

TÜV inspection of the CO2 cylinders:

All reusable CO2 cylinders must be inspected regularly, every 10 years, by the TÜV (at least in Germany). On the cylinder you will always find, but sometimes badly legibly, the date of the last TÜV inspection and sometimes the year of the next inspection.
