

JBL Artemio 1

Breeding container to extend the ArtemioSet

Suitable for:  

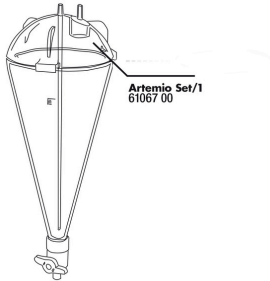

- Home-grown Artemia Nauplii in 24-48 hours: breeding container without air pump and hose.
- Assemble breeding container and, if wished, attach to additional stands via bayonet catch. Air hose can be connected from one breeding container to the next
- Additional aeration device for staggering the setting up times of several breeding containers: a continual supply of live food for sensitive young fish
- Fixed installation: stand to connect to other breeding containers. Optional wall mounting.
- Package contents: 1 breeding container to extend the ArtemioSet. Incl. 1 funnel shaped breeding container with dome cover, 1 stand with screws

Product information

Fish love a varied diet

An unbalanced fish diet can lead long term to deficiency symptoms, diseases and fatty degeneration of organs. Provide your aquarium dwellers with a varied diet in the form of live food. When catching or purchasing live food there is a risk of introducing bacteria and parasites into the aquarium.

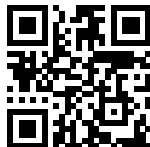

Producing your own live food has many advantages:

- Free of parasites
- Rich in fibre & healthy
- No need to catch in ponds
- Promotes the fish's hunting instinct
- Increases spawning readiness
- Simple, quick and convenient
- Cheap alternative to frozen food
- It's fun to do it yourself

Easy application

Fix the breeding container on the ArtemioSet stand. Connect the breeding container to the air forwarding device.

1 spoonful of Artemia eggs (JBL ArtemioPur) contains approx. 0.3 g Artemia eggs. 2-3 spoons of Artemia eggs are added to the JBL culture device per batch.
