

JBL

Converting from a one-way system to a multi-way system

JBL ProFlora u-system to the JBL ProFlora m-system

**Retrofitting
has never been
so easy!**

All you need is the u-m JBL Adapter to retrofit the pressure reducer of your JBL ProFlora u-CO₂ fertilisation system for multi-way bottles (m system).

The adapter is screwed on to your JBL ProFlora u001 pressure reducer with just one screw so that it immediately fits on all multi-way bottles.

This way, you can avoid rubbish and use refillable bottles!

JBL

Converting from a multi-way system to a one-way system

JBL ProFlora m-system to the JBL ProFlora u-system

Simple conversion with no additional parts!

Simply unscrew the large fastening nut from the pressure reducer with an Allen wrench.

Now the JBL ProFlora m001 pressure reducer fits directly on the CO₂ one-way bottles (JBL ProFlora u500).

This way, the "aquarium sitter" can quickly change the bottle instead of having to fill bottles!

The retrofit can be reversed in just a few seconds any time.
