JBL PROFLORA CO2 CYLINDER STAND

Stand for 500 g CO2 cylinders

Suitable for:

- To ensure safe upright stability of all 500 g refillable CO2 cylinders with round end and up to 6 cm diameter
- Without drilling: simply place the cylinder in the stand
- Because CO2 gas liquefies under pressure, CO2 pressurised gas cylinders must be in an upright position when in operation. This is achieved with a stand
- Sturdy plastic stand
- Package contents: 1 plastic stand for all CO2 cylinders up to 60 mm diameter

JBL PROFLORA CO2 CYLINDER STAND

Product information

Carbon dioxide (CO2) is an odourless and colourless gas that becomes liquid under pressure in the CO2 storage cylinders. That's why the CO2 storage cylinders must be in an upright position during operation. Disposable CO2 cylinders (U system) and the 2 kg refillable CO2 cylinder (JBL PROFLORA CO2 CYLINDER 2000 M) already have a "built-in" stand. The 500 g refillable CO2 cylinders, on the other hand, have a "round" base and therefore need this stand (JBL PROFLORA CO2 STAND) or alternatively a wall mount for screwing (JBL PROFLORA CO2 WALLMOUNT).
