

JBL PROFLORA u401

CO2 plant fertiliser system with disposable cylinder

- Optimal feeding of fast and slow growing plants for aquariums from 40 to 400 l (max. 120 cm)
- Professional water care: precise dosing thanks to the pressure reducer. Ideal CO2 supply with extendable diffuser Taifun
- Best CO2 amount control with bubble counter. Residual pressure display on pressure gauge
- Safe: no slipping of hose thanks to hose screw connection, check valve prevents water entering the cylinder, anti-kink protection for hose
- Package contents: fertiliser system ProFlora u401, incl. dispos. CO2 storage cyl., 2 m hose, anti-kink protection, pressure reducer, diffuser, bubble counter, CO2 permanent test, fertiliser. Storage cylinders available separately or in a pack of 3

JBL PROFLORA u401

Product information

Nutrition for aquarium plants

Healthy plants are important for every aquarium. Plants supply the aquarium with vital oxygen for the aquarium dwellers, prevent algae growth and remove pollutants.

Healthy plants = healthy fish

Healthy plants prevent algae growth, supply oxygen, remove pollutants, provide hiding places and reduce pathogens.

For the plants to flourish the following demands need to be met: Light as energy source for the photosynthesis of CO₂, nutrients and trace elements as growth promoters.

JBL fertilisers supply the plants with all main nutrients and essential trace elements through the water. This way the plants can absorb all the required nutrients they need over the leaves and roots. The capacity of a CO₂ system depends on various factors. The carbonate hardness, the quantity and species of the plants and the strength of the water surface movement are decisive.
