

Vitamins and trace elements for terrarium animals

Suitable for:

- Especially for the requirements of reptiles and other terrarium animals: supplementary food with essential vitamins and trace elements for drinking water, terrarium water or food
- Easy to use: put drops on food and / or in drinking or bathing water container
- Healthy terrarium animals: prevention of deficiency diseases, promotion of growth, appetite and natural moulting

Country: Japan

Language: English

- High-quality vitamin preparation: fully available, water-stable vitamins
- Package contents: 2 bottles of 10 ml each with liquid vitamins and trace elements

Product information

Caters to the needs of reptiles and other terrarium animals

Caters to the needs of reptiles and other terrarium animals
In their natural habitats, reptiles, amphibians and other animals that we care for in terrariums absorb
their vital vitamins, minerals and trace elements through their food. While we try to achieve a natural
diet in our terrarium care, we don't quite manage it. For example, when we feed feeder animals such as
crickets or grasshoppers, these feeder animals do NOT come from the natural biotope of our terrarium
animals and therefore do not provide their normal food! Often, for reasons of price, feeder animals
receive no or only inferior food in contrast to nature. Therefore a food enrichment with JBL PROTERRA
REPTILE FLUID is very helpful to give our pets the right vitamin dosage.
A good, well-known example are poison dart frogs, which lose their toxicity in captivity because certain
ants are no longer available to them as food. This does not bother the frogs and we can even breed
them safely in the terrarium, but they have simply lost the toxicity which came from their nutrition.
