

JBL PROFLORA AquaBasis plus

Long-lasting nutrient substrate f. freshwater aquarium

Suitable for:

- Nutrient substrate for beautiful and permanent plant growth in all freshwater aquariums. Works for 5 years guaranteed
- Nutrient store: contains important plant nutrients, such as iron. Clay components store nutrients and release them again, as required.
- Efficiently prevents unwanted algae growth by promoting plant growth
- How to use for the initial setup: add the nutrient substrate and cover with a layer of rinsed substrate
- Package contents: 1 pack of ready to use, long-lasting nutrient substrate

Long-term soil supplement for plant aquariums

JBL PROFLORA AquaBasis plus

Product information

Nutrition for aquarium plants

Healthy plants prevent algae growth, provide oxygen, remove pollutants, provide hiding places and reduce germs. Living aquarium plants are therefore very important for the functioning of an aquarium.

With the JBL plant care products you supply the plants with all the main nutrients and essential trace elements. This way the plants receive all the nutrients they need for the absorption through the leaves and roots to prevent deficiency symptoms (e.g. iron or potassium deficiency).

What do aquarium plants need for optimal growth?

Full spectrum light: JBL LED SOLAR NATUR

Carbon dioxide (CO2): JBL PROFLORA CO2 System

Iron, potassium and other minerals: JBL PROFLORA FERROPOL

Trace elements which cannot be fertilised in stock: JBL PROFLORA FERROPOL 24 Daily Fertiliser

Root fertilisation: JBL PROFLORA The 7 Balls, JBL PROFLORA FERROPOL ROOT

A lot of aquarium plants absorb their nutrients additionally or even mainly through their roots. It is therefore important to provide the plant roots with nutrients. JBL AquaBasis Plus contains all the essential nutrients for healthy and vigorous aquarium plant growth. The function can easily be compared to a charged battery: JBL AquaBasis Plus immediately supplies the energy (nutrients) for the plants and, when the supply runs low it can be recharged with the help of liquid fertilisers (JBL Ferropol and JBL FerropolRoot).
