

Curved spring scissors for mosses and lawn plants in aquariums

Suitable for:

- Professional cutting of mosses and lawn plants to create aquarium landscapes: curved spring scissors for aquascaping plant maintenance
- Easy handling: 27 mm sized finger holes also suitable for bigger fingers, fatigue-free working thanks to light weight: 19.5 g, length: 16 cm
- Especially smooth surface: stainless high-quality steel, made in Japan with extremely high cutting precision
- Maintenance tip: rinse with freshwater after use in saltwater
- Package contents: 1 pair curved spring scissors for aquascaping, ProScape Tool S

Country: Slovakia

Language: English

Product information

Underwater gardener Aquascaping is the term used to describe the technique of designing aquarium landscapes. This is the place for plant compositions, for the reproduction of a landscape above water or for natural biotopes. An aquascaping aquarium contains no or few fish and invertebrates.

Pro Scape Tool spring The curved spring scissors are especially well suited for cutting mosses and removing plant leaves.
