

# Reflector for JBL TempSet

[www.JBL.de](http://www.JBL.de)

## for energy-saving lamps up to max. 30 W

- Bundles the radiation of energy-saving lamps, thereby increasing the radiation intensity under the lamp by up to 100 %.
- Can easily be mounted subsequently by simply clipping onto a **JBL TempSet** Bulb Holder Kit.
- **Exclusively** suited for energy-saving lamps up to 30 W.
- Not suited for lamps and ceramic heat lamps that become hot!

**A tip from the experts:** Indispensable for increasing the depth of penetration and effective guidance of vital UV-B light in UV-B emitting energy-saving lamps.
