

Food wafers for professional feeding of large plant-eating catfish.

UK

- **Fast sinking, hard wafers**
- **10 % wood fibre, a vital ingredient for a healthy digestive system.**
- **Readily accepted due to top quality raw vegetable ingredients.**
- **Keep their shape in water for a long time, allowing slow-feeding fish to graze naturally.**

Recommended feeding: Feed the fish once or twice a day (or at night for nocturnal animals) with only as much food as the fish can consume within about 20 minutes. As the wafers are stable in water for up to 24 hours without disintegrating, a few uneaten wafers do not pose a problem.

Ingredients: vegetable by-products, vegetables, cereals, molluscs and crustaceans, algae, fish and fish by-products, yeast, minerals.

Staple food for aquarium fish.

Additives: colourings, antioxidant E306 (natural vitamin E extracts).

Vitamins (per 1000 g):

A: 25,000 IU

D₃: 2,000 IU

E: 330 mg

C (stable): 400 mg
