- Precise measurement and healthy fish: high accuracy glass thermometer for aquariums
- Easy to install: attach thermometer with suction cup in the aquarium, read off temperature
- 15 cm long glass capillary (very precise reading), made in Germany. Temperature range from 0 - 50 °C
- Acid and alkali-resistant suction holder
- Package contents: 1 aquarium thermometer incl. suction cup

JBL Aquarium Thermometer Slim

Spare parts

JBL suction cup with hole, 5/6 mm
Suction cups for objects with 6 mm in diameter

JBL Aquarium Thermometer Slim

Product information

Healthy fish and plants
Fish depend on the right ambient temperature because, being cold-blooded animals, they are not able to adjust their own body temperatures. The vital functions of cold-blooded animals decrease with falling temperatures. The right aquarium temperature is therefore very important to ensure the animals maintain their food intake and guarantee a smooth continuation of the metabolic processes. Depending on the origin of the fish, the temperature they feel comfortable at, varies. With the JBL aquarium thermometer Slim you can monitor the temperature to an accuracy of 1.0 °C. Precise measurement Thanks to a suction cup the glass thermometer can be easily attached inside the aquarium.
