Coconut cave for aquariums
and terrariums

JBL DisCon

Product information

High acceptance

Female fish like to lay their eggs on a rough and slightly slanted surface. Once laid, the eggs stick well on this surface. The spawning cone consists of stable plastic material which makes it unbreakable.

Advantages of spawning cone:

High acceptance by female discus fish

Slanted and rough surface provides an ideal hold for the eggs

Stable and unbreakable

Easy to clean

Tip: boil the cone before inserting in the aquarium. This cleans and disinfects the cane at the same time and protects the eggs against potential bacteria. Our customer's wishes are of the utmost priority for our company. Our production site in Germany not only means we take our social responsibility seriously, it also ensures the high quality of its products. With our research department and our worldwide expeditions into the habitats of the animals we permanently set new standards with our product innovations.
