

JBL ArtemioMix

Mix of Artemia eggs and salt for mixing

Suitable for:  

- Live food for tropical freshwater and marine fish. Mixed food comprised of brine shrimp eggs, salt and micro algae for the diet of aquarium fish
- To use: add 2 measuring spoons of the mix to 0.5 l tap water. The brine shrimps hatch after 24 to 36 hours
- Optimal pH value thanks to balanced proportion of salt
- 230 g ready mix for 14 applications, each of 0.5 l water
- Package contents: ArtemioMix, ready mix of salt and brine shrimp eggs, incl. measuring spoon 5ml.

JBL ArtemioMix

Product information

Fish love a varied diet

An unbalanced fish diet can lead in the long term to deficiency symptoms, diseases and fatty degeneration of organs. Provide your aquarium dwellers with a varied diet in the form of live food. When catching or purchasing live food there is a risk of introducing bacteria and parasites into the aquarium.

Producing your own live food has many advantages:

- Free of parasites
- Rich in fibre
- Not just a „pool“ anymore
- Promotes the hunting instinct of the fish
- Increases readiness of spawning
- Easy, quick and convenient
- Affordable alternative compared to frozen food

It's fun to do it yourself :

- Add salt to the water
- Put the Artemia eggs into the saltwater
- Wait until the brine shrimps have hatched
- Strain the brine shrimps into a sieve
- Ready for feeding
