

Pulling aid and cleaning brush for impeller bearings

- Practical auxiliary tool to maintain and to improve the performance (JBL CristalProfi e: 401, 402, 701, 702, 901, 902, 1501, 1502, 1901, 1902)
- Easy to use: remove the bearing bush at the end of the ceramic axis with the pulling aid. Clean the well with the brush
- Diameters: brush 17 mm, pulling aid 4.5 mm
- Cleans areas which are difficult to reach perfectly. The lower impeller bearing (rubber sleeve) in external filters is practically inaccessible without using the correct tool

Country: Canada

Language: English

■ Package contents: pulling aid and cleaning brush for impeller bearings

### Product information

Clean and healthy water
Plant and food remains and metabolic substances lead to a deterioration of the quality of the water in
the aquarium. Good water quality is necessary for healthy fish and plants. This can be achieved with
variuous filters. The filters suck in the aquarium water and remove the pollution and waste materials
from the water. Filters also offer an ideal habitat for bacteria which decompose harmful substances.

Maintenance of the pump performance

The pulling aid helps you pull the bearing bush out of the external filter at the end of the ceramic axis. Without a pulling aid it is difficult to reach. With the help of the brush the well, in which the impeller rotates, can be cleaned perfectly. Cleaning the impeller well improves the performance and restores the original performance of the pump.
