

# JBL TempSet Unit L-U-W

Installation kit for metal-halide lamps

Suitable for:

- For the safe operation of any metal-halide lamp: pre-assembled installation kit with quick coupling
- Attach holder in terrarium cover, screw in LUW lamp (separately available), plug in
- Lamp angle freely adjustable up to 180°, heat-resistant to 270 °C. For metal halide lamps such a socket with ballast is absolutely necessary, as they cannot be operated in normal sockets without ballast
- Made in Germany – quality ballast with automatic shut-off, overheat protection, safety shutdown (if metal-halide lamps do not ignite).
- Package contents: installation kit ready for connection for all metal-halide lamps with E27 socket. (Available for the following wattages: 35, 50 and 35-70 W)

## Product information

For their operation metal-halide lamps (e.g. JBL L-U-W or HQI) require a specially designed ballast to match their respective wattage. JBL has installation kits for 35, 50 and 35-70 W.

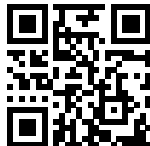

### Optimal safety

The quality ballast is equipped with an automatic shut-off that does not even attempt to ignite the lamp in the event of the following problems or switches it off automatically after 2-3 attempts:

- defective metal halide lamp
- too old metal halide lamp

### Modelled on nature

Terrarium animals are cold-blooded animals, highly dependent on light, especially on the quality and intensity of the light. Activity, food intake, digestion or rest phases are influenced by the change of day and night and the intensity of the light. Different light sources produce differing output and light quality. With metal-halide lamps it's easy to install the right light in your terrarium and to align it to its best position. Its angle can be freely adjusted up to 180°. The device is heat-resistant to 270 °C. It is equipped with an automatic shut-off and an overheat protection mode.
