

JBL TempReflect light

Reflector screen for energy-saving lamps

Suitable for:

- Doubles light 100%: high gloss reflector screen for terrariums.
- Clip reflector to holder (JBL TempSet not included), screw in lamp, switch on – ready!
- Increases depth of penetration and directs the essential UV-B light (with energy-efficient lamps emitting UV-B)
- Not suitable for use with lamps that get very hot or with heat emitters
- Package contents: reflector screen for energy-saving lamps, TempReflect light

JBL TempReflect light

Product information

Modelled on nature

Terrarium animals are cold-blooded animals, which are strongly dependent on light, especially on the quality and intensity of the light. Activity, food intake, digestion or rest phases are influenced by the change of day and night and the intensity of light. Depending on the light source, there are differences in output and quality of the light. With metal-halide lamps you have exactly the right light for your terrarium and it is optimally adjustable too. Its angle can be freely adjusted up to 180°. The device is heat-resistant to 270°.

Ideal safety

The quality ballast is equipped with an automatic shut-off and an overheat protection.
