

JBL PROFLORA Florapol

Long-term nutrient substrate concentrate

Suitable for: 

- Long-term supply for the substrate: long-term substrate fertiliser for freshwater aquariums
- Nutrient depot: contains all important plant nutrients such as iron and clay, stores nutrients and releases them as required
- Optimal promotion of plant growth means less algae growth. No phosphates and nitrates
- Use when setting up a new aquarium: mix nutrient substrate concentrate with substrate, cover with a layer of washed gravel/sand
- Contents: 1 packet Florapol. Effective for a minimum of 3 years

Long-term soil supplement for
plant aquariums

JBL PROFLORA Florapol

Product information

Nutrition for aquarium plants

Healthy plants are important for every aquarium. Plants supply the aquarium with vital oxygen for the aquarium dwellers, prevent algae growth and remove pollutants.

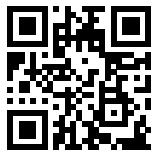

Healthy plants = healthy fish

Healthy plants prevent algae growth, supply oxygen, remove pollutants, provide hiding places and reduce pathogens.

For the plants to flourish the following demands need to be met:

Light as energy source for the photosynthesis of CO₂, nutrients and trace elements as growth promoters.

With JBL fertilisers you supply the plants with all main nutrients and essential trace elements. This way the plants get all the required nutrients they need to absorb over the leaves and roots to prevent deficiency symptoms (e.g. iron deficiency).
