

JBL ProFlora m001 (pressure reducer)

Fitting to reduce pressure of refillable CO2 bottles

- Reliable and exact CO2 dosing for aquariums: precision pressure reducer for refillable CO2 cylinders, cylinder pressure regulation from 60 to 1.5 bar
- Easy to use: screw pressure reducer onto the refillable cylinder. Connect it also with hose to the diffuser in the aquarium. Adjust CO2 bubble count at the fine needle valve
- Precision needle valve: exact adjustment of bubble count, preadjusted working pressure: 1.5 bar (readjustment possible), 2 pressure gauges: working and cylinder pressure, connection thread: M 10 x 1
- Safe to use: excess pressure safety valve, highest reliability: diaphragm controlled pressure reducer
- Package contents: pressure reducer for refillable CO2 cylinders, ProFlora m001

JBL ProFlora m001 (pressure reducer)

Accessories

JBL ProFlora CO2 Vario
500 seal

JBL ProFlora m001 (pressure reducer)

Spare parts

JBL ProFlora "m" O-ring

JBL ProFlora "u" flat seal

JBL ProFlora "u/m" flat seal

JBL tube screw connection 4/6 pressure reducer

Product information

Ideal nutrition for plants

Carbon dioxide serves as the main nutrient for plants and thus promotes their ideal growth. Plants use CO₂ for photosynthesis and thus supply the water with essential oxygen. They prevent algae growth, remove pollutants, offer hiding places and reduce pathogens.

The correct amount of CO₂ varies from aquarium to aquarium and depends on the volume, the water movement and the planting of the aquarium. With the JBL pressure reducer a precise dosage of CO₂ is possible.

Easy to install

Screw pressure reducer onto the refillable CO₂ cylinder. Connect it with a hose to the diffuser in the aquarium. Adjust the CO₂ bubble count with the fine needle valve. The two pressure gauges indicate the cylinder and the working pressure.

Hazard-free use

The pressure reducer is equipped with an excess pressure safety valve. This ensures a safe release if the working pressure is set too high, without damaging the fitting. The diaphragm control of the pressure reducer ensures absolute reliability.

Tip: can also be converted to fit a disposable system.
