## Product information

Especially for the nutritional needs of iguanas

Pronounced herbivores need food stuff which is low in protein and rich in fibre to remain healthy. The food for iguanas deliberately contains only vegetable ingredients which are high in fibre and low in proteins.

### Feeding recommendation

Feed several times a week as much as can be eaten in a short time. For adult animals 4 to 5 feeds per week are sufficient. Feed alone, soaked in a little water, or feed together with fresh meadow herbs.
