JBL SOLAR REFLECT Clip Set

Holder for fluorescent tubes

Suitable for:

- Plastic holders to attach fluorescent tubes to the reflectors. For the optimal illumination of the aquarium/terrarium
- Easy assembly: fix clip through the hole at lower reflector panel, click clip holder at the upper panel to the clip. Fix it by sliding. Optimal clip attachment makes changing the clip easy
- Clip made of UV-resistant plastic
- Not suitable for fluorescent tubes switched in tandem
- Package contents: clip holders for fluorescent tubes (2 pcs.), Clip Set Solar Reflect

JBL SOLAR REFLECT Clip Set

Product information

Maximum light output without additional energy costs
An optimal illumination of the aquarium/terrarium is important both for plant and coral growth and also to minimise algae growth. By using reflectors a maximum light output can be achieved – without additional energy costs. In addition they serve as a glare protection while you work in your aquarium.

Holders to attach fluorescent tubes to the reflectors
Attach clip to the lower reflector panel, click clip holder at the upper panel to the clip. Not suitable for fluorescent tubes switched in tandem.
