Product information

Fish love a varied diet

An unbalanced fish diet can lead in the long term to deficiency symptoms, diseases and fatty degeneration of organs. Provide your aquarium dwellers with a varied diet in the form of live food. When catching or purchasing live food there is a risk of introducing bacteria and parasites into the aquarium.

Producing your own live food has many advantages:

- Free of parasites
- Rich in fibre & healthy
- Not just a „pool“ anymore
- Promotes the hunting instinct of the fish
- Increases readiness of spawning
- Easy, quick and convenient
- Affordable alternative compared to frozen food
- It's fun to do it yourself
