

JBL NovoLotl XL

Main food for large Axolotl

Suitable for:  

- Complete nutrition and ideal growth for larger-sized Axolotl: with proteins and fats from water animals
- Nutritious and easy to digest: ideal feeding conditions created by sinking food pearls, for amphibians min. 18 cm in size. Water-stable for bottom-feeding Axolotl
- No water clouding: reduced algae growth thanks to balanced phosphate content, better water quality due to better digestibility of the food, which reduces amphibian excrement
- Axolotl find their food by their sense of smell. NovoLotl has a scent the animals like and which leads them to the food pearls in the aquarium.
- Contents: main food, for Axolotl. After opening use up within 4 months. Unopened storable for 3 years in high-quality packaging with foil seal.

JBL NovoLotl XL

Product information

Animal welfare is important to us

No processing of cheap fish meal, uses fish meat from fish fillet production with the motto: The large fillet for humans and the small fillet for our aquarium fish.

For years JBL has supported the largest international organisation for the protection of sharks "Shark Project".

Other good reasons to use JBL fish food:

- The use of pure fish protein without cheap fish meal
- Optimal protein/fat ratio
- Mainly proteins from water animals
- Reduction of algae growth and optimum fish growth thanks to adapted phosphate content
- Impressive acceptance on the part of fish: research expeditions with fish feeding trials in the wild
- Very slight vitamin loss due to airtight sealed packaging

Ahead through research

The results of the JBL research expeditions, combined with the expertise of the JBL research and development team, has resulted in optimal and balanced food mixtures made of high-quality ingredients.

Feeding recommendation

Feed 1 – 2 times a day, as much as can be eaten within a few minutes. Young, growing fish 3 – 4 times a day in the same way.

Unopened the food tins can be kept for 3 years, after opening use up within 4 months, since valuable vitamins will deteriorate.
