

JBL ProSilent Aeras Micro Ball L

Air stone for fine air bubbles

Suitable for:

- Air pump accessory for aquariums: air stone made of quartz sand mixture with extra-fine pores - for especially fine air bubbles. Especially suitable for pond aeration
- Air stone easy to connect to the air pump (not included), place inside the pond or aquarium
- No extra weighting: own weight of the air stone keeps it on the ground
- For fresh and saltwater aquariums: ball shaped air stone
- Package contents: 1 air stone, 40 mm diameter, Aeras Micro Ball L

JBL ProSilent Aeras Micro Ball L

Product information

Air pump accessory for aquariums

At night an air pump with air stone is an advantage for the aquarium because plants without light don't produce oxygen, but continue to consume it. In thinly planted aquariums the air pump with air stone supplies the necessary water circulation. In aquariums with dense planting the air pump provides the aquarium with oxygen at night, since the number of plants means the oxygen concentration can drop to a dangerous level. When disease is present in the aquarium the air pump increases the oxygen level in the water, which is essential for many medications.

Simple connection

Connect the air stone to the hose of the air pump (not included), place the air stone inside the pond or aquarium. The own weight of the air stone keeps it on the ground.
