Product information

Healthy fish – healthy pond
Fish have feelings too – not only humans! Transport often triggers stress in fish. Bad water values can be the reason for bacteria, fungi and parasites. Remedies actively combat the pathogens and lower the risk of infection. They reduce stress hormones, protect the mucous membranes, disinfect injuries and kill off bacteria, fungi and parasites.

JBL Online Hospital
Visit the JBL Online Hospital and find out what is ailing your pond dwellers. Having considered the various factors JBL suggests the best treatment.

Correct use of remedies
Use only in water temperatures over 18 °C. Remove activated carbon from the filter and switch off UVC devices, ozone units, copper and hydrochloric acid dosage devices. Shake bottle thoroughly for one minute. Mix the required quantity with pond water in a watering can and distribute it evenly over the pond. To be added in the morning while observing the animals throughout. Remains in the pond: 1 week.

Dosage
40 ml per 800 l pond water.
