JBL ProFlow u800

Universal pump with 900 l/h for circulation of water

Suitable for:

- Clean and healthy water: universal pump with 900 l/h output for the circulation of water in aquariums and aqua-terrariums. Use for bio filters, indoor fountains and other fountains

- Easy to install as internal or external pump: connect under water with strainer attachment or outside by hose connection. Hose inlet 19/25 (or strainer), outlet 16/22 to pump, connect mains plug

- Only 4 cm water level required when operating under water. Adjustable pump capacity, stainless steel shaft, max. pumping head 0.95 m. Can also be operated outside the aquarium by means of a hose connection

- Tested to TÜV, low power consumption of 7 W, completely submersible (IPX8), sturdy mounting due to 4 suction cups

- Incl. 4 suction cups. Dimensions (l/h/w): 79.1 x 45.5 x 82.5 mm. Choice of strainer suction protector/hose connection on the suction tract

Product information

Clean and healthy water
Plant and food remains and metabolic substances lead to a deterioration of the quality of the water in the aquarium. Good water quality is necessary for the promotion of health in fish and plants. Water pumps ensure permanent circulation and contribute to the maintenance of clean and healthy water.

Versatile use
Thanks to its small size the JBL submersible pump fits in every bio filter and thus can be used as feed pump in clarified water filters. The low minimum water level of 4 cm also makes it an ideal pump in indoor fountains and fountains in aqua-terrariums.

Safe and economical
The submersible pump is tested to TÜV and completely submersible (IPX8). It achieves high output at a low consumption of 7W. Three suction cups ensure sturdy mounting.
