

JBL BabyHome Oxygen

Premium spawning box complete kit with air pump

Suitable for:

- Separation of parent fish and isolation of incompatible animals: extra-large spawning box with cover and built-in oxygen supply for the breeding of fry
- Complete kit – ready for immediate use: Use as double spawning box, single spawning box or as breeding container
- Healthy fish: rising air bubbles for good water circulation and for the promotion of the hatching rate, two-part container: separation of breeding females, two different spawning grids, stabilisation inside the aquarium with suction cups
- Airlift principle: gentle, steady water flow with quality air pump – increased well-being of parent fish, reduction of loss rate, output 3 W
- Package contents: 1 premium spawning box complete kit, BabyHome Oxygen. Incl. spawning box, air pump, air hose, air stone

Product information

Continuous, smooth water flow

Air is introduced in the middle of the spawning box through a riser tube. The air rises to the top. As a result the water is also pushed up the pipe through the circular water outlet and is evenly distributed inside the spawning box. The gentle, steady water flow promotes the well-being of the parent fish, increases the hatching rate and optimises their breeding success.

Suitable for open aquariums and aquariums with a cover pane.

Complete kit, ready for immediate use

Mount the suction basket with a quarter turn clockwise onto the opening in the bottom of the spawning box. Put the circular water outlet into the upper end of the riser stem. Connect the air hose with the air connection at the water outlet. Place the box in the position you have chosen. Connect the air hose to the air pump and connect the air pump to the power supply.

Can be used in 3 variants:

- Double spawning box: both funnel shaped inserts are inside the spawning box
- Single spawning box: replace the funnel shaped inserts and partition walls, replace with large V insert
- Large double (with partition walls) or single breeding container (without partition walls)
