

# JBL PROFLORA Bio160

Bio-CO<sub>2</sub> fertiliser system with extendable diffuser

Suitable for:

- Natural CO<sub>2</sub> fertilisation for 80 days: healthy plant growth, less algae. Bio-CO<sub>2</sub> starter set for aquariums from 50-160 l
- Simple to install: ready for use within a few minutes
- Natural: CO<sub>2</sub> produced in a biological fermentation process. Immediate and long-term buffer system ensures steady production of CO<sub>2</sub> for 2 x 40 days, refillable. Improves plant growth in red, fine-structured and sensitive plants. Extendable diffuser
- No pressurised gas cylinder needed, special CO<sub>2</sub> resistant hose
- Package contents: bio-CO<sub>2</sub> fertiliser system, ProFlora bio 160, incl. reaction canister with thermal casing, 2 x refill set, CO<sub>2</sub> diffuser, 3 m CO<sub>2</sub> hose, check valve

## Product information

### Nutrition for aquarium plants

Healthy plants are important in every aquarium. Plants provide the aquarium with vital oxygen for the aquarium inhabitants, prevent algae growth and remove problem-causing substances.

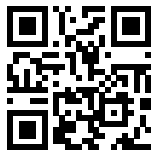

### Healthy plants = healthy fish

Healthy plants prevent algae growth, supply oxygen, remove pollutants, offer hiding places and reduce pathogens.

For the plants to flourish the following demands need to be met:

Light as an energy source for the photosynthesis of CO<sub>2</sub>, nutrients and trace elements to promote growth.

JBL plant fertilisers supply the plants with all their main nutrients and essential trace elements through the water. This way the plants can absorb all the required nutrients they need over the leaves and roots.
