

JBL StartKit

Complete water treatment for freshwater aquariums

Suitable for: 

- Add the water conditioner to the aquarium water, continue with the bacteria starter 15 minutes later. Then insert fish
- Water conditioner removes harmful substances from tap water and starter adds pollutant-decomposing bacteria
- Without bacteria starter an accumulation of toxic ammonia and nitrite occurs
- Ideal for freshwater aquariums with fish, shrimps and turtles
- Contents: 1 x 15 ml water conditioner JBL Biotopol and 1 x 15 ml bacteria starter JBL Denitrol for 10-60 l aquarium water

JBL StartKit

Product information

Tap water often contains heavy metals and sometimes chlorine which is harmful for fish and invertebrates. The water conditioner JBL Biotopol helps to bind heavy metals and to neutralise chlorine. The water conditioner needs about 15 minutes to take effect. Then add the aquarium starter JBL Denitrol which supplies the aquarium with the beneficial cleansing bacteria not initially present. Only with the help of cleansing bacteria can fish excrements be broken down effectively. That's why the fish stock can be added directly after the use of JBL Denitrol.
