

JBL ProSilent Aeras Micro Plus

Air stone for fine air bubbles in aquariums

Suitable for:

- Air pump accessories for aquariums: air stone made of quartz sand mixture with extra-fine pores for especially fine air bubbles
- Simply connect air stone to the air pump (not included), place inside the aquarium
- Large surface with 140 or 270 mm length, unobtrusive green colour
- For fresh and saltwater aquariums. Second air connection to place a number of air stones in a row
- Package contents: 1 x JBL air stone for fine bubbles, extendable, Aeras Micro Plus

Product information

Air pump accessories

At night an air pump with air stone is an advantage for the aquarium because plants without light don't produce oxygen, but continue to consume it. In thinly planted aquariums the air pump with air stone supplies the necessary water circulation. When disease is present in the aquarium the air pump increases the oxygen level in the water, which is essential for many medications.

Simple connection

Connect the air stone to the hose of the air pump (not included), place the air stone inside the aquarium.
