

# JBL LED SOLAR NATUR

High-performance LED light for freshwater aquariums

Suitable for: 

- Maximum light efficiency for beautiful aquatic plants: extremely high photosynthetically active radiation (PAR) of more than 220  $\mu\text{M/s/m}^2$
- Plug & play: clip light in tube holder or set it up, connect cable, switch on or dim via remote control and select one of 3 light colours
- Evenly distributed warm white and cool white LEDs for a biotope-compatible light climate, 2 channels with 3 preset light colours: 2700 K (warm white), 4500 K (daylight white), 6400 K (cool white)
- You can extend the features by using your smartphone to include preset biotope-compatible or individual light controls and the JBL LED SOLAR EFFECT RGB light for special colour effects
- Contains: water-protected light (IP67), remote control, driver (receiver), power supply unit, con. cable, holding brackets for top assembly & end caps f. installation in tube sockets (T5&T8). Guarantee: 2 years (+2 years upon registration of product)

## Accessories

**JBL adapter UK for all  
flat-pin plugs**

**JBL LED SOLAR  
CONTROL**  
Control unit for JBL LED SOLAR  
lights

**JBL LED SOLAR  
Hanging**  
Rope hanging fixture for JBL  
LED SOLAR lights

# JBL LED SOLAR NATUR

## Spare parts

**JBL LED SOLAR end cap set**

**JBL LED SOLAR Holding Bracket Set**

**JBL LED SOLAR Driver**

**JBL LED SOLAR connection cable**

**JBL LED SOLAR Y- Cable Switch**

**JBL LED SOLAR IR sensor universal**

**JBL LED SOLAR IR remote control**

# JBL LED SOLAR NATUR

## Product information

But the light spectrum of aquatic plants varies considerably from the spectrums found in our household or torch LEDs. We are talking here about the photosynthetically active radiation range of the light, called PAR, and a full spectrum which covers ALL the spectral ranges of the visible light spectrum. Only by combining these two components can we achieve the perfect light for aquarium plants!

The special features of the new JBL LED SOLAR lights:

The JBL LED SOLAR lights are suitable as replacements for ALL fluorescent tube lengths. Along with the light itself, the standard JBL SOLAR NATUR includes a remote control unit for simple and professional operation. The IR remote control means several JBL LED SOLAR systems can be operated simultaneously, as the frequency of the IR receivers is identical. If you don't want this, simply move the receivers further away from each other. Then you'll be able to operate each LED unit individually with the same remote control.

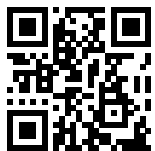

Marine water: The JBL LED SOLAR NATUR was originally developed for freshwater aquariums, but has also proved very popular with marine aquarists, as almost all cultivated corals come from shallow waters where they receive full sunlight. If you combine the JBL LED SOLAR NATUR with the JBL LED SOLAR EFFECT, you'll attain a colour temperature of 7800 Kelvin.

Lengths: the lengths stated (e.g. 22 W = 43.8 cm) refer to the fluorescent tube you are replacing.

Length of lamp: 22 W/38.3 cm; 24 W/49.5 cm; 37 W/68.7 cm; 44 W/79.5 cm; 57 W/99.2 cm; 59 W/109.5 cm; 68 W/139.5 cm

Length with plug-on holder suitable for: 22 W/45-70 cm; 24 W/55-80 cm; 37 W/75-100 cm; 44 W/85-110 cm; 57 W/105-130 cm; 59 W/115-140 cm; 68 W/145-170 cm

General calculation of lamp length: Stated length e.g. for 44 W 849 mm incl. retrofit adapters for the replacement of fluorescent tubes, minus adapter lengths (always the same): -50 mm -5 mm= 794 mm real lamp length.
