JBL PRONOVO BEL GRANO S

NEW

Granulated main food S for all 3-10 cm ornamental fish

Suitable for:

- Prebiotic aquarium fish food with garlic: dedicated dietary fibres in the food supply the beneficial intestinal bacteria with food for healthy digestion
- Natural raw materials without artificial additives for a natural diet and healthy aquarium fish. Tested on JBL research expeditions in the tropics
- Very high acceptance even with choosy fish thanks to high-quality raw materials such as salmon, squid, shrimps and garlic
- Promotes the colours of all ornamental fish species with natural astaxanthin (a very high-quality carotene) from krill and spirulina. The declaration squid stands for molluscs such as mussels and snails, which are eaten by many fish
- Package contents: original sealed, air- and light-tight, recyclable tin with click doser as feeding aid

JBL PRONOVO BEL GRANO S

Product information

In community aquariums with different species of fish, the ornamental fish kept will have different demands on the food. JBL PRONOVO BEL takes the different feeding types into account and offers your fish a wide variety and choice for a natural and healthy diet. If you wish to further enhance the range of foods available, you can supplement the staple food JBL PRONOVO BEL with other foods from the JBL species concept and with treats.

JBL PRONOVO BEL staple food, the perfect nutrition for all omnivorous fish and fish communities. With a protein/fat ratio of 6.3:1, exactly the right ratio is achieved which is ideal for most tropical fish species. Higher fat contents lead to fatty degeneration in warm water fish's (23-30 °C) organs! In fish communities, as in most community aquariums, the 15 main ingredients of PRONOVO BEL form a perfect nutritional base that can (not must) be supplemented with species foods to individually adapt and further diversify the diet of fish species. It's no problem if, for example, your bettas also eat the food for your barbels and vice versa. It is only important that you offer the right food for each group of fish. Variety is always good!

It is really important to choose a food size that fits the mouth size of the fish species. Flakes soften quickly and can be eaten by almost all fish species. It is different with granulate where the smallest mouth size of the fish you keep decides which food size you buy. You'll find the fish size the food is suitable for written on the bottom left of the tins. It is better to choose a food that is on the small side rather than one that is too large!

About garlic: Fish, of course, are not familiar with garlic from their habitats. But observations we made during the JBL expeditions in the South American Pantanal showed that fish reject underwater plants and prefer to jump out of the water to eat the apparently tastier leaves of the bushes and trees at the water's edge! These contain more flavour than the "slimy" underwater leaves. This is exactly the effect that adding garlic achieves.

JBL PRONOVO BEL GRANO S

Food type	granulates
Sub product type	complete food for ornamental fish
Dosing	Feed 1 – 2 times a day, as much as can be eaten within a few minutes

Analytical components

	Crude protein	38 %
	Fat content	6 %
	Crude fibre	4 %
	Crude ash	7 %

Composition

salmon meal
wheat germs
rice meal
soy bean meal
shrimp meal
wheat meal
krill meal
wheat gluten
spinach
spirulina
Apple fibre
Mediterranean herbs
Garlic powder
yeast extract
Beetroot

Additives

Colourings
are not added by JBL

Antioxidants
1b306(i)
