

Granulated staple food for cichlids (8-20 cm)

Suitable for: ≪

- Prebiotic & sinking aquarium fish food: dedicated dietary fibres in the food supply the beneficial intestinal bacteria with food for a healthy digestion
- Natural raw ingredients without artificial additives for a natural diet and healthy cichlids. Tested on JBL research expeditions in the tropics
- Very high acceptance amongst all cichlid species thanks to high-quality raw ingredients such as salmon and shrimps
- With the very high-quality natural astaxanthin from krill and spirulina, which ensures perfect colour formation in cichlids such as the firemouth cichlid
- Package contents: original sealed, air- and light-tight, recyclable tin with dosing aid in the lid

#### Product information

Cichlids are an incredibly diverse group of fish with 1700 species. They range in size from a few centimetres (checkerboard cichlid) to 80 cm Crenicichla species. All cichlids are brooders. Their food spectrum ranges from microorganisms to plants and other fish. It is therefore important to be well informed about the species kept in the aquarium!

JBL PRONOVO CICHLID S has been specially developed for smaller species up to about 10/12 cm in length. The most common of these species kept in the aquarium are Microgeophagus, Apistogramma, Pelvicachromis, Pelmatochromis, Nannacara, Nanochromis, Crenicara, Laetacara, Dicrossus und Ivanacara. Eartheaters of the genera Geophagus and Satanoperca grow large, yet also prefer small-sized food, which they seek out from the sand (hence the name eartheater).

JBL PRONOVO CICHLID M is suitable for all medium-sized cichlids from 8-20 cm. This includes many species of the genera Cichlasoma, Acarichthys, Aequidens, Thorichthys, Amalatitlania, Crytoheros, Heros, Andinocara, Pterophyllum, Uaru and many more.

JBL PRONOVO CICHLID XL is then ideal for the big guys between 15 and 25 cm. This includes many species of the genera Crenicichla, Cichla, Amphilophus, Astronotus, Mayaheros, Cichlasoma, Rocio and several others.

Advantages of JBL foods: Use of pure fish protein without cheap fish meal. Optimum protein/fat ratio. Mainly proteins from aquatic animals.

Prebiotic: Scientists are agreed on this that prebiotics promote digestion and thus health. In the case of our fish, there is another essential aspect: with better digestion, less is excreted and the water is thus less polluted, causing fewer algae problems and keeping the water cleaner.
