JBL PRONOVO FEX

NEW

Tubifex treats for all ornamental fish from 8-20 cm

Suitable for:

- Freeze-dried Tubifex as an ideal food supplement/treat for all freshwater fish, crabs, crayfish, shrimps and axolotol
- Tubifex are very energy-rich and strengthen the organism of the fish
- Alternative to live and frozen food: supplementary nutrition for tropical freshwater fish. Drying process preserves nutrients
- Vacuum freeze-drying process ensures that important nutrients are retained in the dried feed animals
- Package contents: original sealed, air- and light-tight, recyclable tin with dosing aid in the lid

JBL PRONOVO FEX

Product information

Tubifex are part of the natural diet of many ornamental fish that search the ground for food. The 15-85 mm long Tubifex live in the soil and the blood pigment haemoglobin results in their red colour as long as they live. During the freeze-drying process, the red colour disappears. Unlike live and frozen food, there is no danger of introducing diseases or unwanted bacteria into the aquarium.

The JBL PRONOVO FEX "chunks" float on the water surface because of their buoyancy. The fish can bite off smaller chunks there. Alternatively, the chunks can be pressed slightly in the water so that their buoyancy is reduced.

To expand the diet of ornamental fish, supplementing their main diet with freeze-dried foods is highly recommended. The following types of food are available for this purpose: JBL NOVO DAPH (water fleas), JBL NOVO ARTEMIO (brine shrimps), JBL NOVO FEX (tubifex), JBL NOVO FIL (red blood worms).

Food size/mouth size:
It may sound obvious, but it is important that the food size fits the mouth size of the fish. Not all fish are able to bite off larger chunks of food. The fish size to which the food size fits is written on all JBL food tins at the bottom left of the front of the labels.
