CARE PFLEGE **ENTRETIEN**

JBL PROCLEAN POWER

Cleaner for CO2 diffusers and aquarium decorations

Suitable for: <

- For effortless cleaning of technical equipment and decoration in cases of algae and other organic soiling
- Easy to use: dilute 1:10 with water, pour into metal-free container and steep soiled objects for 1 hour. Then rinse thoroughly with tap water
- A chlorine compound in the product dissolves any organic soiling without scrubbing or other effort and leaves items like new
- Not suitable for use on wood, plants or other living organisms. When first using on decorative articles: test an inconspicuous spot on the product beforehand
- Package contents: concentrate for 10 | ready-to-use cleaning solution in reclosable bottle in outer carton

Product information

Effective

CARE

The JBL cleaner PROCLEAN POWER ensures a fast and effective cleaning of diffusers, aquarium technology and aquarium decoration.

Simple to use:

Pour cleaning solution over soiled diffusers and objects in a suitable container (not metal!). Leave to soak for about 12 hours. Then rinse the cleaned objects thoroughly with tap water.

Important!

Immerse porous decorative objects only briefly in JBL PROCLEAN POWER, then brush off. Next place in tap water for 3 days and renew the water daily.

Different types of soiling: In aquariums and terrariums there are usually 2 types of soiling to deal with: lime residue (whitish deposits above the water surface and cover panes) and organic soiling such as algae coatings and brush algae on decorative and technical products. You can quickly and easily remove limescale residues with JBL PROCLEAN AQUA in aquariums and JBL PROCLEAN TERRA in terrariums. JBL PROCLEAN POWER helps with organic soiling.

The effective chlorine components create a certain pressure inside the closed bottle, causing the floor surface to bulge outwards. This is no reason for concern and why the bottle is delivered in an outer carton.
